Our Services

Bracco Systems is the professional IT Services provider, focused on all aspects of Information Systems for the North Bay business community.

In light of the current economic downturn, Bracco has developed an operational model that efficiently enhances the clients bottom line through simple and effective principles:

- Improve access to corporate data and interoperability of systems
- Streamline & Automate business processes
- Expand the reach of your marketing by intelligently exploiting the Internet, Social Networking
- Reduce overhead costs by exploiting Open-Source products, Cloud Computing

Bracco can develop custom solutions tailored to your company's needs and business processes or adapt off-the-shelf software applications to your business environment.

Network Services

Our network professionals can design, implement, deploy, and support your networking systems from simple workgroup LANs to WANs, Wireless LANs, Broadband Remote Access. Our experts can assist with selection and implementation of network systems from procurement to implementation to training and support. After reviewing your requirements we can design a network for your needs, implement maintenance procedures and set up backup and security systems. We can also save you money with a service agreement so that you can be secure in the knowledge that your network is protected. Whether you need a simple shared printer or want to connect remote sites and a mobile sales force - we have the expertise and tools.

Custom Software

Bracco has, through thousands of hours of research and development, acquired a clear understanding of the role software should play in enhancing your companies profitability. And since our suite of services includes all aspects of design, existing software integration, complete documentation and onsite training your solution won't suffer from missing pieces.

Web Systems

We can incorporate your existing company logo and colors in the graphic design of your website. If your company is new, we can help you to design a logo and a professional website to match. Establish your presence on the web with a Domain, Web Site Blog or Newsletter. Optimize your website for search engines and use Social Networking to promote your business.

Technology

We work with a large selection of 3rd party products in a number of industry segments including legal, medical, travel, real estate, retail, construction. Bracco Software Development utilizes a thorough complement of the latest available technologies and platforms. A technology and vendor neutral approach assures you the best solution for your critical business needs without bias for platform or technology. Our Engineers have hands-on experience in the latest tools and technologies to provide you with the best, most cost effective and maintainable solution.

Consulting

We can assist you in a variety of productive consulting arrangements tailored to your specific needs and business parameters. The latest project management tools are utilized to assure timely, complete and bug free delivery of your project.

Turnkey Solutions

We will select the right servers, clients, network components, software and peripherals to run your systems. After thorough evaluation of your business objectives, geographic makeup and any special user requirements, we can specify a complete Network, Systems & Software configuration tailored to your company.

Support

Do you anticipate regular service or maintenance? Bracco has a number of plans that can fix and reduce your costs and give you the convenience of a single contact for your systems. Please contact a Solutions Specialist for more information or free consultation.

Utilizing our experience maintaining highly reliable mission critical systems, Bracco is setup to immediately take on the maintenance of your valuable IT resources to assure round the clock operation.

Training

In today's environment of ever increasing systems complexity effective personnel IT training is a key to organizational effectiveness. We develop and present training to help our clients successfully rollout their systems and applications. Our programs are tailored for your business needs and level of expertise.
